

**R2M Pharma, Inc.**  
**Research Associate, Medicinal Chemistry**

**Job description:**

R2M Pharma is a fast-growing biotechnology research organization devoted to the discovery of high-quality small molecules preclinical development compounds for the treatment of unmet medical indications. We are searching for highly motivated, team-oriented scientists with good technical skills and a track record of problem solving to join our team of dedicated professionals devoted to advancing novel treatments to unmet medical indications.

**Essential Duties and Responsibilities:**

- Responsible for executing medicinal chemistry strategies in an efficient manner to meet project goals and deadlines
- Establishes consistency in solving complex technical problems
- Contribute as a member of a multidisciplinary team of high functioning drug discovery scientist driving forward projects
- Create and build strong working relationships with your fellow colleagues and management
- Demonstrate the ability to communicate project updates and strategic thinking
- Ensure the laboratory maintains the highest laboratory safety standards
- Help contribute to R2M Pharma culture of value creation

**Qualifications:**

- BS or MS in organic or medicinal chemistry
- Skilled in the art and practice of modern synthetic and mechanistic organic chemistry
- Practical experience in multi-step syntheses and problem solving
- Competence with the use of modern spectroscopic methods applied to structure determination including  $^1\text{H}$  NMR,  $^{13}\text{C}$  NMR, 2D NMR, IR, and mass spectroscopy
- Experience in the use of preparative and analytical chromatographic separations
- A strong track record of creative problem solving
- Excellent oral and written communication skills
- Excellent teamwork skills and the ability to work efficiently and productively in a fast-paced, multi-disciplinary environment
- Competence with good laboratory practices that promote a safety-oriented professional work environment
